DOUBLE LAYER  
DESIGN BY F·A·PORSCHE

- Burn customized 8.5GB video DVDs
- DVD-RW and DVD+RW formats
- Store photos, MP3s, videos on double layer discs
- Comes with PC/Mac recording software

## store 8.5GB on a single sided disc

With new double layer DVD recording technology, the LaCie DVD±RW Drive can be used to store nearly twice as much data as before. With up to 8.5GB of space on a single-sided, double layer DVD disc, save up to 16 hours of VHS video, 4 hours of personal, high-quality DVD video or up to 8.5GB of important information. Large-capacity, double layer DVD media is also ideal for backing up computer systems or saving thousands of MP3s.

## choose CD or DVD media

Conveniently compatible with DVD+R/RW and DVD-R/RW media, the LaCie DVD±RW Drive lets you choose the DVD format you'd like to use for your personal projects. With the ability to store digital data on DVD or CD media, this all-in-one rewritable drive accommodates a variety of multimedia jobs.

## broad compatibility

This rewritable drive can also be connected to any PC or Macintosh computer, making it the most versatile drive around. Compatible with virtually all DVD players, completed DVDs can be played back to share with family and friends. Write to DVD-R/RW, DVD+R/RW, CD-R/RW and double layer DVD±R media.

## full-featured software suite

An easy-to-use interface allows you to piece together Hollywood-style DVD movies in a matter of minutes complete with menus, thumbnails and backgrounds for a totally customized DVD. Complete software includes double layer recording software for PCs or Macs.

- power supply
- LaCie DVD Utilities CD including software suite and user's manual

### System Requirements

- Pentium III 500MHz processor or greater; Apple PowerMac G4 500MHz processor or greater
- 128MB RAM (256MB RAM recommended)

### CD-RW/DVD-RW 4.7GB

- FireWire-equipped Apple Macintosh computer with Mac OS 9.1 and greater, or Mac OS 10.2.3 and greater (incl. Mac OS 10.4 Tiger)
- IEEE 1394/iLink or USB 2.0-equipped IBM-compatible PC with Windows 98SE, Me, 2000 or XP
- 5GB free hard disk space for DVD authoring

### DVD+R Double Layer 8.5GB

- FireWire-equipped Apple Macintosh computer running Mac OS 10.2.3 or greater (incl. Mac OS 10.4 Tiger)
- IEEE 1394/iLink or USB 2.0-equipped IBM-compatible PC with Windows 2000 or Windows XP
- 10GB free hard disk space for DVD authoring

### IMPORTANT

Double layer recording requires Windows 2000, Windows XP or Mac OS 10.2.3 and greater.

A gigabyte = 1 billion bytes. Total accessible media capacity varies depending upon operating environment. \*iLink users must use a 4-pin to 6-pin cable (sold separately) and FireWire 800 users must use a 9-pin to 6-pin cable (sold separately). \*\*Including DVD video authoring (Mac OS 10.2.3 or greater) <sup>▼</sup>DVD±R Double Layer disc required  
<sup>▼</sup>Mac Users: For best performance, use the FireWire interface, unless you are using a G5 or a G3/G4 with a USB 2.0 PC/PCI card running OS 10.2.8 or later.
